FELLOWSHIP AND AWARDS

Edward E. Zajac Prize for the Best Third-Year Paper (Honorable Mention) 2023
Steve Manos Prize for the Best Second-Year Paper (Honorable Mention) 2022
University of Arizona Graduate Fellowship, 2020

TEACHING

University of Arizona, *Sole Instructor*
ECON300 Microeconomics Analysis For Business Decisions Online (×2)

University of Arizona, *Teaching Assistant*
ECON460 Industrial Organization (× 4) ECON462 Firms, Markets, and Competition (× 3)
ECON551 (MBA) Business Strategy (× 2) ECON407 Economics of Strategy (× 2)
ECON508 (Ph.D.) Applied Economic Analysis (× 1)

RESEARCH ASSISTANT

Research Assistant to Mo Xiao, University of Arizona 2023 - 2024
Research Assistant to Eric Hamilton, Pepperdine University 2016 - 2020

WORKING PAPERS

**Closing the Opioid Use Disorder Treatment Gap:
Expanding Nurse Practitioners’ Prescriptive Authority**

The Comprehensive Addiction and Recovery Act (CARA) of 2016 allows Nurse Practitioners (NPs) to prescribe buprenorphine independently to combat the opioid epidemic. Using a Difference-in-Differences analysis, this study finds that the policy leads to a 27% increase in NPs prescribing buprenorphine, a 16% rise in buprenorphine consumption, and an 11% reduction in opioid-related mortality. However, the policy also reveals potential moral hazards, unequal access in rural areas, and a shift in treatment focus away from comprehensive specialized programs.

Anatomy of Opioid Diversion: Examining Supply-Side Curtailment
With Mo Xiao, Chuan Qin

Rogue pharmacies worsen the opioid epidemic by diverting opioids to non-medical users. Using pharmacy-level opioid shipment and hospital diagnosis data, we examine the spatial redistribution of opioid shipments after targeted shutdowns by the Drug Enforcement Administration. A structural model reveals that over half of pharmacy-distributed opioids were diverted to non-medical use. Aggressive pharmacy crackdowns may drive non-medical users who lose access to black markets towards more dangerous narcotics like heroin and fentanyl.

Anatomy of a Scandal: #Batterygate and Consumer Choice

I link over 35,000 individuals' Twitter behaviors to their offline phone purchases to examine the heterogeneous consumer response to Batterygate, where Apple slowed down iPhone processors without acknowledgment in 2017. Using a novel trend-extrapolated Differences-in-Differences technique, I find that Batterygate only negatively impacts potential consumers, not the current user base, highlighting the importance of consumer heterogeneity in determining customer responses to negative media sentiment.
